

Top sealing machines

Small little Samson

Wisdom is better than strength. This compact MetalPack Type 190 therefore has a number of outstanding and excellent characteristics.

- Film roll not behind but above the machine. That saves space!
- Unique locking mechanism. With his light operation and high closing pressure it is stronger than all other sealing machines in his class.
- Electronic temperature regulation with display. It cannot be more accurate.
- Heated seal plate with non-stick surface. No more scraping and scrubbing.
- Attractively priced. The sealing machine for which you don't have to save.
- Solid quality, as you are used to from MetalPack.

MetalPack Hand Sealing Machine Type 190

MetalPack

Hand Sealing Machine Type 190

Compact and complete

Developed on request

We are regularly asked whether we could develop a cost effective, high quality sealing machine that also fits to a smaller working surface. The result is here now: the MetalPack Type 190. No other machine is as compact and complete as this one.

User-friendly

Without compressed air and without 'tours de forces' you will be able to achieve a high closure pressure. Furthermore, it's easy to clean thanks to the stainless steel housing and the non-stick surface on the sealing plate.

Reliable

Thanks to the electronic control, you can set the sealing temperature very precisely. The display shows all the data you need and the silicone profile at the lower mould ensures optimum pressure. In this way the machine ensures constant quality.

Multi-functional

The MetalPack Type 190 is suitable for all packaging which suit top sealing. Each mould from our menu series fits into this sealing machine. You simply exchange the moulds in a snap and stores them below.

Made-to-measure

Do you work within maximum dimensions with a different type of container? Based on a drawing or a sample, we will gladly produce your mould made to measure. For more information, contact MetalPack or your dealer.

Please visit our website www.metalpack.nl for other models or consult your dealer.

Technical Specifications

Capacity:	0,65 kW
Voltage:	220/240 Volt - 50/60 Hz
Current:	3 Ampere
Foil Width:	190 mm maximum
Foil Role Diameter:	Ø 230 mm maximum
Operating temperature:	100 – 180 °C (electronically adjustable)
Scale format:	227x178x80 mm maximum
Dimensions (bxdxh):	open, 26x43x53 cm closed, 26x55x30 cm
Shipping weight:	16 Kg
